

Put Down Roots in Tualatin

Key Knife / Tualatin River Greenway Trail

June 8, 2016

Corporate employees contribute to forest diversity and stream health.

- Key Knife employees spent the afternoon along the new Tualatin River Greenway Trail completing final details on the Greenway Trail restoration site.
- 1200 native trees and shrubs planted by volunteers spring 2016, received TLC from Key Knife staff. Their efforts staking, mulching and watering plants will ensure a better survival rate and reduce the threat of invasive plant species from taking over the site.
- Thank you to Key Knife staff and management for making Tualatin a better place to live, work, play and volunteer!

Thank you Key Knife!
